

# Protect Your Hotel and Guests With Quality Roof Maintenance

## Keeping Your Roof in Shape

BENTONROOFING

As the person responsible for your hotel's operations, you know how vital the structural integrity of your building is. Leaky roofs can cause damage that forces you to close parts of your building, costing you not only in repairs but in lost business as well. At Benton Roofing, we want to help prevent this by providing quality roof maintenance to help protect your most valuable assets, as well as your RevPAR.

## Getting The Most Out of Your Roof

Getting the maximum usage out of your current roof is a goal we want to help you accomplish. In addition to repair services, we also provide many services to stop small issues from becoming big problems. We work with hotel owners, managers, supervisors and hospitality groups to find solutions that will fit your needs.

When left untreated, small issues with your roof have a way of snowballing into problems that require extensive repairs or even total roof replacement. If you are serious about maintaining the longevity of your current roof, proper maintenance is the best way to do so.

### Our Services

We are familiar with both hotels and the hospitality industry, including the unique challenges they offer. Whether you manage one hotel or many of them, you're well aware that leaky roofs can be a problem that is best avoided. Left neglected and a small problem could become your biggest nightmare: a massive leak causes the drywall ceiling to collapse in one of your upstairs suites, followed by angry guests, poor reviews, and maybe even a hurt reputation? Not to mention the cost of property damage, repairs, and lost revenue.

At Benton Roofing, we offer full-service roof replacement, however, we also understand that reroofing is not always an option. Our technicians are also highly trained in a wide variety of repair procedures. Our services include:

- 24-hour emergency repairs available every day of the year
- Quick identification and repair of leak sources
- Long term solutions that go beyond emergency repairs

We service a variety of roofing systems, including steep-slope and low-slope roofs. We are proud of our ability to provide every step of the roof installation process. Beyond just the roof of your building, we are also able to provide custom sheet metal components for gutters, chimney caps, and much more, all through our in-house metal fabrication facility.

## Our Philosophy

We value the individual businesses we work with and want to do everything we can to avoid some of the common frustrations you may have with other roofing services. We communicate with you to understand your unique needs and always keep you in the loop on projects that affect your building.

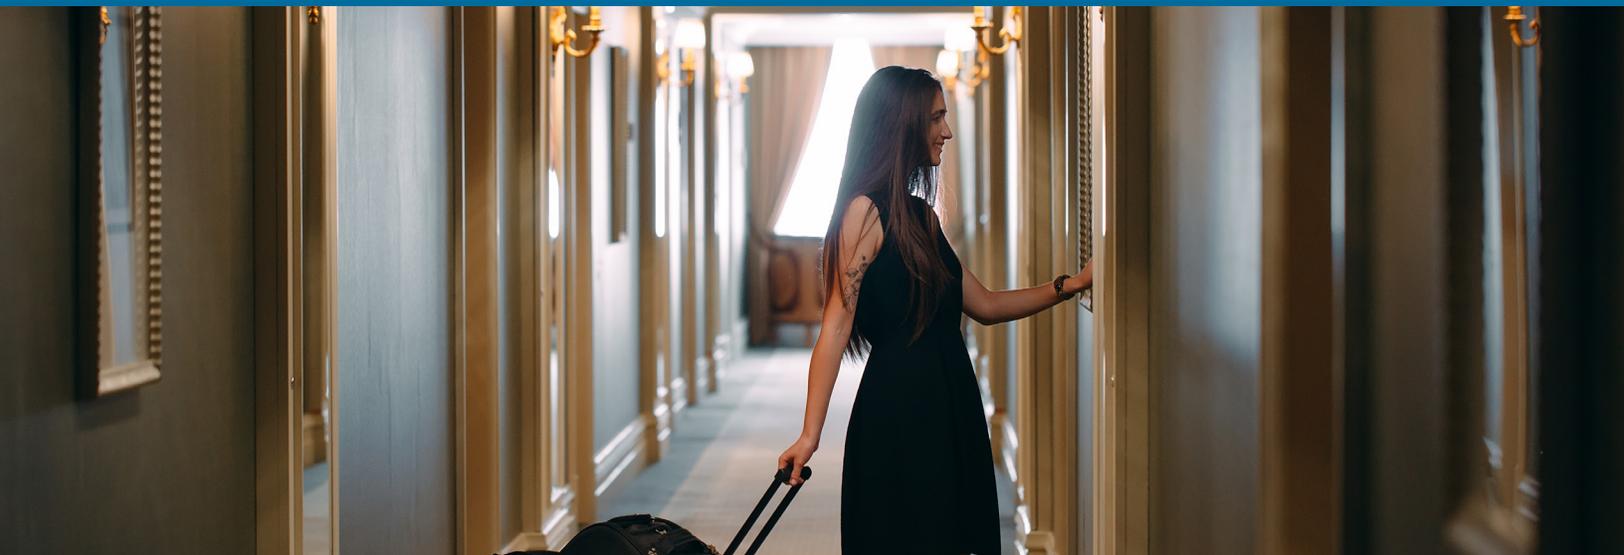

We are a company based on the core values of honesty, integrity, and excellent service. We want you to have as much success as possible in your ventures and believe that we can help you accomplish this through a positive professional relationship.

## Experience You Can Trust

Professionalism is always our priority. Our teams understand the proper safety procedures to follow. Every team member has passed background checks and will arrive at your site in a company-marked vehicle.

With over 40 years of experience in the industrial roofing industry, we have the experience to provide superior quality maintenance and repairs. When it is eventually time for a new roof, we are happy to provide you with the expertise you need to get a replacement that will last for years.

## BENTONROOFING

Benton Roofing is a full-service commercial roofing company that specializes in maintenance, repair and commercial reroofing. For over 40 years, we have provided high-quality commercial roofing solutions.
